- Convenient storage
- Portable for easy transport

## Engineered Thumb Screw

- Anti-spin-out design
- Prevents accidental falls

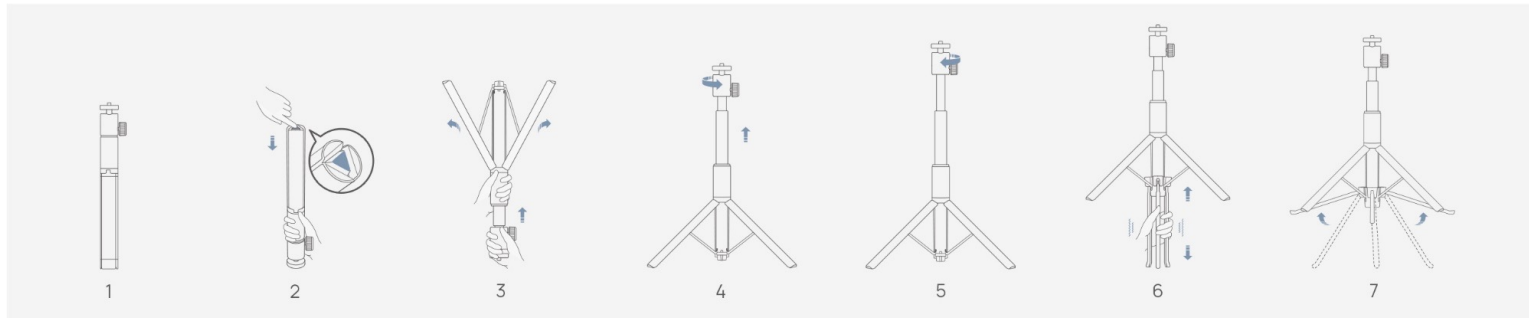

## Non-Slip Silicone Padding

- Protects floors from scratches
- Stable, anti-slip positioning

## To ensure a better user experience, please read the following notes carefully:

- Follow the < installation steps > to use the product correctly.
- Please adhere to the max load capacity when mounting projectors and other devices.
- Non-professionals should avoid disassembling the bracket or stand by themselves.
- Ensure that the setup surface is even and flat. If placed in potholes or tilted in other uneven positions, the machine may tip over completely. Please operate with caution.
- Avoid using the product aggressively, as it may lead to deformation or severe damage.

## Installation Steps

1. The support stand acts extra support for more stable operation.
2. 3kg is the max load capacity of the stand without the support stand.
3. Please ensure only appropriate conversion accessories are used when mounting cameras, smartphones, and other devices.  
For XGIMI projectors, if there is no screw hole at the bottom of the machine, please use an appropriate conversion plate;  
For other products, check the screw hole standard at the bottom and prepare an adapter as required.
